Dashboard - District - Anand (Gujarat)

— Gujarat - Anand
— Best Value

Description	Gujarat - Anand	Best Value
Per household purchasing power	0.166	0.175
Rural female literacy rate	0.171	0.184
Urbanisation rate	0.184	0.249
*Spread of Economic Activities	0.068	1.019
Growth rate of Purchasing Power	0.161	0.246
Growth rate of Economic activity	0.162	0.260
Volatility of PP	0.194	0.289
Volatility of economic activity	0.155	0.295
Composite scorecard	0.294	0.802

* Number of economic activities where the district ranks in top 100 in India

Why should you use DM?

- Visualisation through maps helps in comprehending information quickly and simplifies decision-making
- Juxtaposing your internal data on the map along with DM data helps in pin-pointing emerging trends
- Identify and make geographic interventions in your business & public-policy
- Visualise and build on the growth potential across districts and towns

District Metrics (DM)

District Metrics (<https://districtmetrics.com/>) is a web-delivered, map-based service that combines official data as well as estimations based on authentic official data on --- Demographics, Disposable income & Economic activity – for all 640 districts and 500 most populated towns in India. The service is empowered with visualisation of data on interactive maps along with a facility to juxtapose users’ data on the map.

Content Coverage in District Metrics

Datasets	Data Granularity	Source	Time Series
Demography - Census, 2011	Districts & Towns	Preliminary Census Abstract, Census	2011
Disposable Income - Household Purchasing Power	Districts with rural and urban breakup & 500-plus most populous towns	Akara’s Estimates	2010-11 to 2017-18
Economic Activity - Indices of Economic Activities	Districts	Reserve Bank of India	2010-11 to 2017-18

Features of District Metrics

- **User Interface** --- A query-based UI to facilitate filtering/querying the data on all the parameters
- **Geo-Visualisation**--- The results of the query can be viewed on a map
- **Data Export** --- The results of the query can be seamlessly exported to spreadsheets
- **Users-data overlay facility:** Users can juxtapose internal data on the map, alongside DM estimates to facilitate informed decision making
- **Contiguity** – Interactive maps facilitate in deciphering patterns across contiguous districts
- **DashBoard for Relative Scoring** - Ready analytical data-sets----- Relative scoring of districts for all parameters and Ranking of districts on different parameters

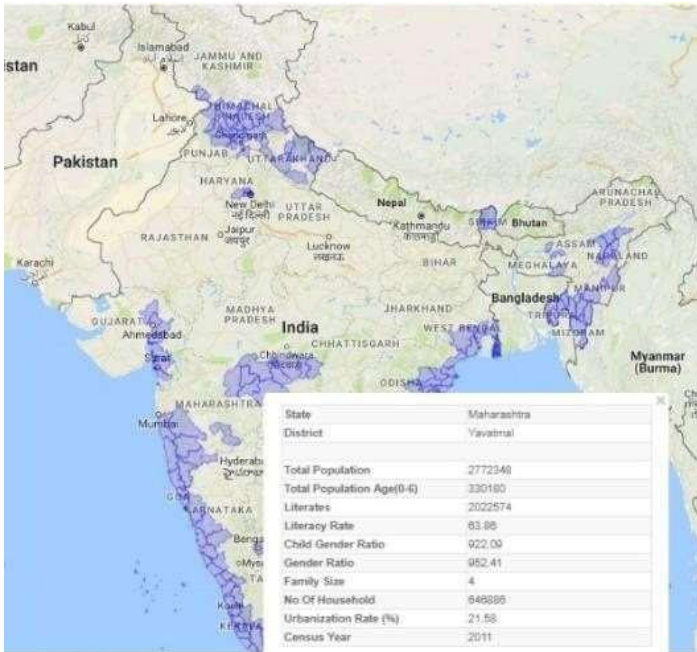

User Segments & application of District Metrics

- **Consulting** ----DM enables consultants to measure the potential of households markets India with geographical granularity; Users include Mckinsey. etc
- **Academia & Research**----DM enables faculty to conduct research & students to conduct assignments in marketing; Users include IIM-A, IIM-B, IIM-C etc
- **Corporates** --- DM enables senior management to identify & unravel the potential of their products across micro-geographies
- **Government Departments** – Governance – Understanding patterns in inter-district disparities, regional imbalances, promoting regions/districts etc; Users include MEA

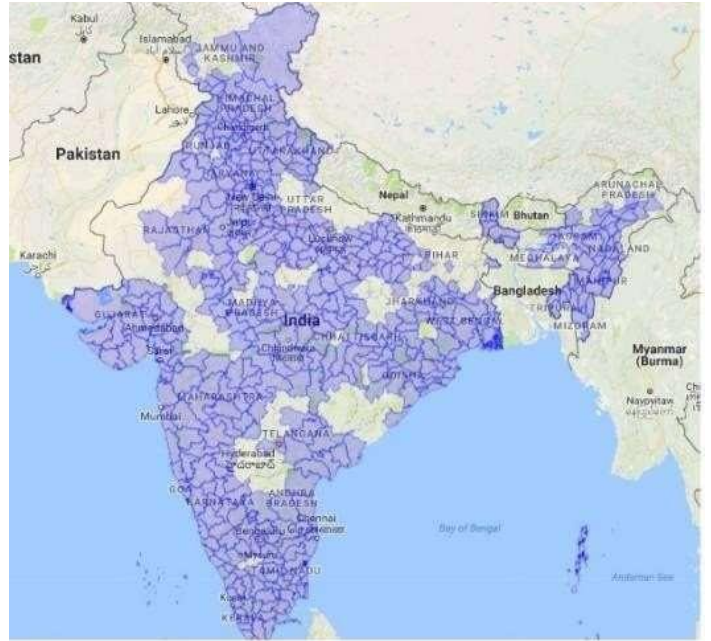

Snapshots of District Metrics

Gender Gap in Literacy levels

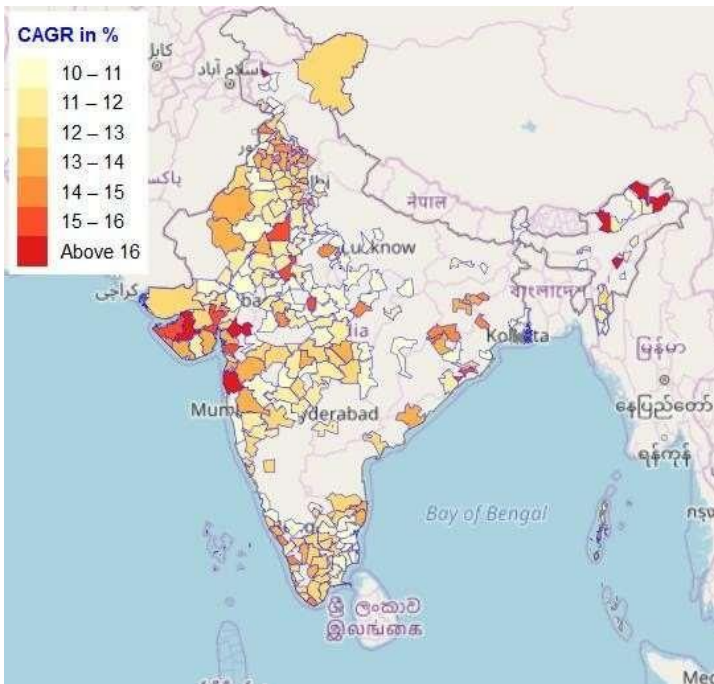

Districts with Rural Female Literacy over 60%

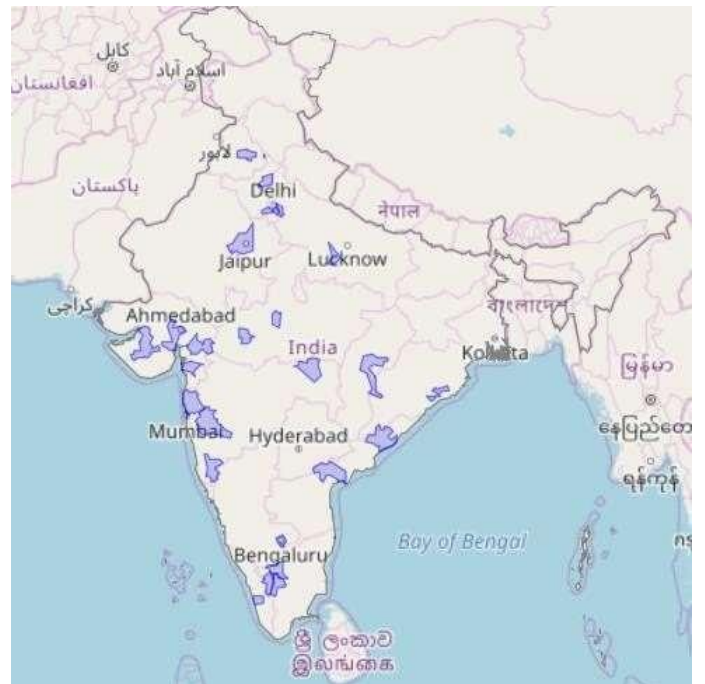

Districts with Rural Male Literacy over 60%

Purchasing Power & Economic Activity across Districts

Districts with CAGR above 10% in Per-Household Purchasing Power between 2010 to 2018

Districts with Manufacturing & Processing index greater than 3
